### **Expanding your reach**

**Atikokan FHT**

**Leading Our Community to Better Care and Access**

The Atikokan Family Health Team (AFHT), located in a small northern rural community, acts as a strong leader in local health care, spearheading multiple different initiatives & teams with the help of our many partners to create the best care & access for our patients.

The AFHT utilizes patients' surveys, which have been edited to include a question regarding our after-hours services. We opened our Health Links program up to a 3rd party for a patient evaluation process and used feedback to improve our processes. We also conduct patient engagement sessions, to allow our patients to voice their concerns or suggestions.
