

## EMR User Meetings with Vendors

**Thursday, October 16, 2014 from 8:00 AM to 9:15 AM**

The EMR Vendor sessions are opportunities to join fellow users and vendors in discussion about progress on user priorities identified in advance via the AFHTO Communities of Practice for each vendor.

Communities of Practice are slightly different than user groups in that they are intentionally about equality of contribution and learning from all members, vendors and users alike.

To that end, vendors and users have been working together on regularly scheduled teleconferences to address questions as they emerge.

For users who are actively involved in CoP, the EMR vendor sessions are an opportunity to hear about emerging solutions to priorities not yet addressed in the CoP. For users who have not yet joined a CoP, it is a chance to provide input to help refine the CoP's understanding of their needs. For all users and vendors, it is a chance to experience the CoP process in person, something that can help make the process work even more smoothly when it returns to its teleconference format after the conference. [Click here](#) for a sample agenda of each session.

EMR Communities of Practice Meetings hosted at the conference:

- AccuroEMR
- Nightingale
- OSCAR
- P&P Data Systems
- TELUS Practice Solutions

Vendors interested in participating in a session should contact [marg.leyland@afhto.ca](mailto:marg.leyland@afhto.ca) for more information.
