

Strategies for Opioid De-Implementation in Primary Care

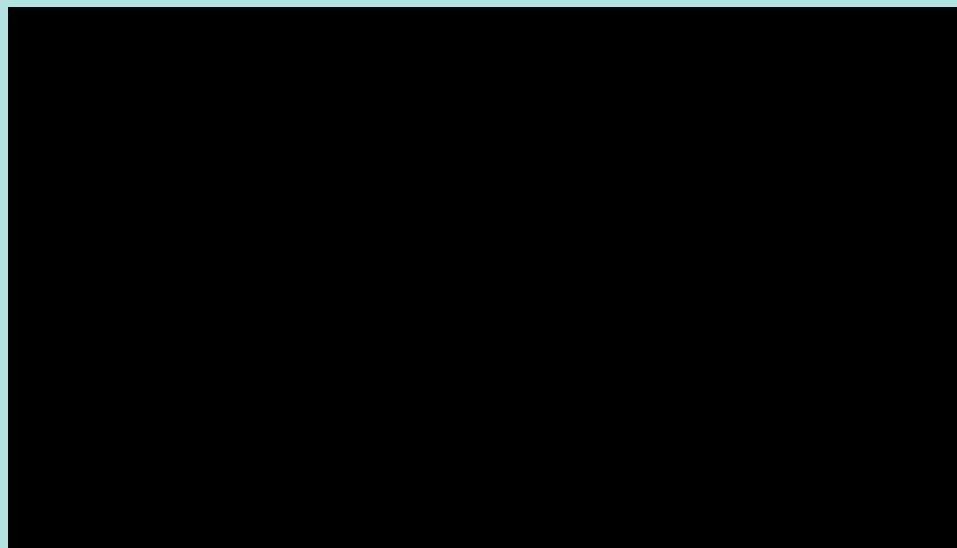

KTE Day
June 11, 2018

Learning Objectives:

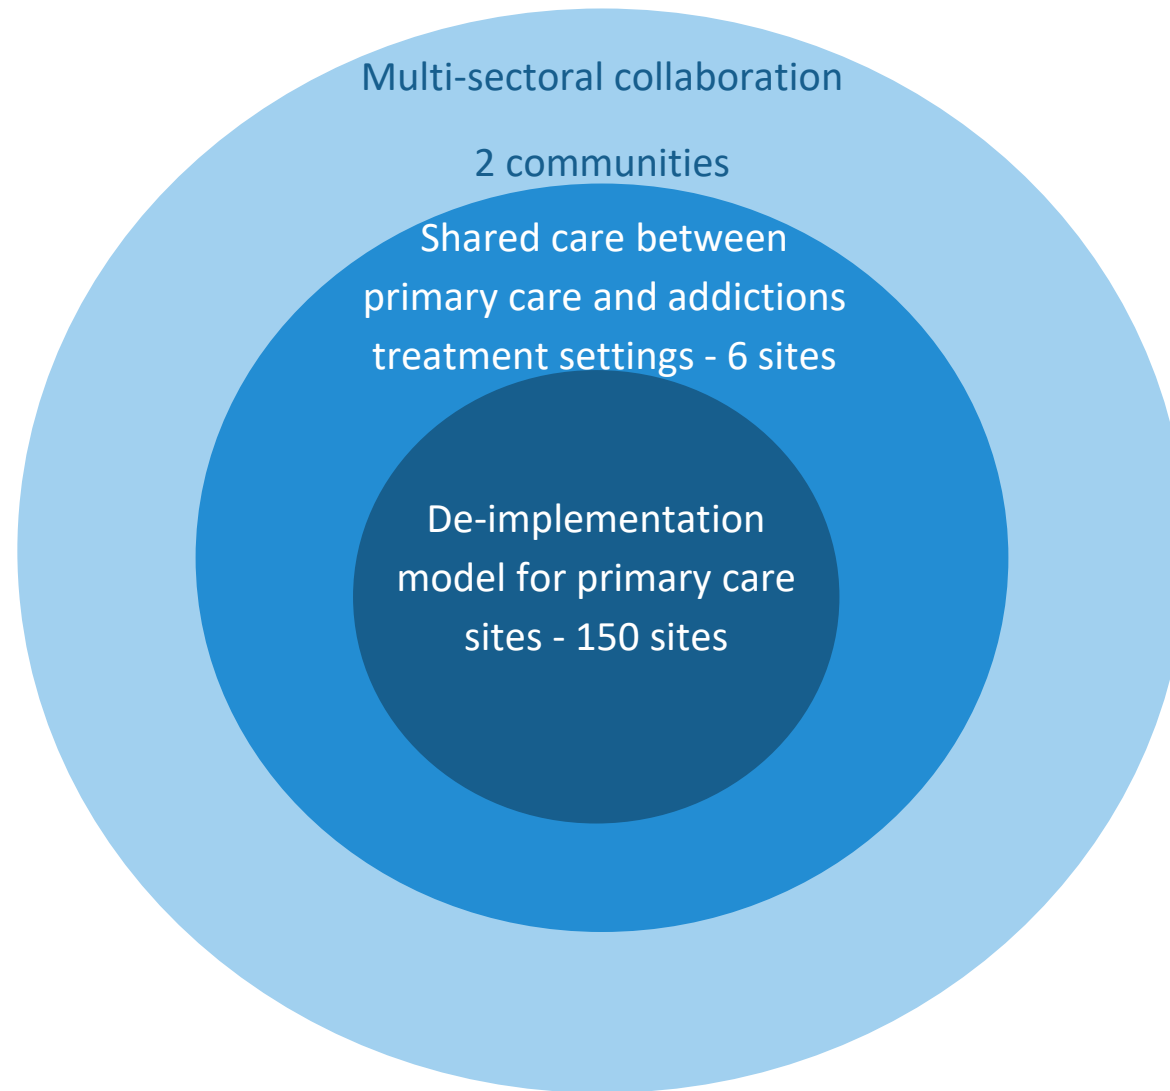

- 1 Describe the value of opioid de-implementation
- 2 List the tools used to support interprofessional de-implementation efforts in primary care
- 3 Apply skills to support interprofessional de-implementation efforts in primary care

Let us start by listening to the journey of one of our patients:

What does Opioid De-implementation mean?

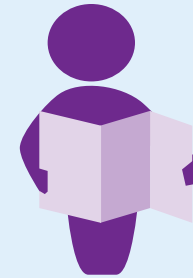

How can you be involved in this project?

Step 1: Complete the Readiness Assessment Survey

Why?

- To indicate your team's interest
- To decide on the right place to start

For a copy of the survey, find one of our staff today, or contact opioid.project@camh.ca

We are here to listen, share and learn from each other!

Making the Choice, Making It Work

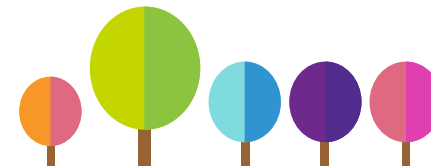

Treatment for Opioid Addiction

SECOND EDITION
formerly published as *Methadone Maintenance Treatment: Client Handbook*

camh
Centre for Addiction and Mental Health

- Easy to read client handbook
- Provides information, such as:
 - How treatments work
 - Side effects
 - Risk factors
 - How family and friends may support their loved ones

For a copy of this book,
find one of our staff today, or contact
opioid.project@camh.ca
