Modality: Live videoconference, Live&Archived Webcast

**note: only live videoconference will be accredited*

CEPD accreditation available to those who:

* attend live videoconference only

*participate in Q/A during session

*complete and return questionnaire after attending webcast

Description

Early recognition and understanding of risk factors related to disorders of the brain and mind is important to promote wellness through prevention and early treatment. This OTN mini-series will focus on recent advances in technologies that mediate and manage these risk factors. This series includes a personal story of the transition from physician to patient, recent brain apps and technologies, youth mood and suicide risk, and the role of sugar and the brain.

Objective

By attending this course, participants will learn to:

- Recognize important risk factors related to disorders of the brain and mind
- Recognize and understand new and recent advances in technology regarding the brain and mind
- Develop a better understanding of current issues in mood and suicide risk in adolescents

AGENDA | Each presentation will include time for questions from the audience
