

Resource Estimator

Carol Mulder, AFHTO

But we are ALREADY busy!!

- Clinical time spent on follow-up depends on
 - Number of patients hospitalized
 - Timeliness of notification
 - Seamlessness of workflow to find and contact patients
 - Nature of follow-up (eg phone call or wrap-around)
 - Proportion of patients selected for follow-up (eg all or seniors only)
 - Role of clerical staff
- Teams may have to adjust or negotiate one or more elements

Calculating YOUR scenario...

Download the [Follow-Up Resource Calculator](#) spreadsheet to calculate how much time (in minutes per week or FTEs) your team would need to for follow-up. Tweak your goals until the time required to reach them is manageable. Full instructions for using the Calculator can be found on the “instructions” tab.
