

Is this real? Exploring “psychogenic” dementia

Presented by:

Uri Wolf, MD, FRCPC, Psychiatrist, Baycrest &
Regina Jokel, PhD, Clinician Associate, Rotman Research
Institute, Baycrest,
Assistant Professor, Department of Speech-Language
Pathology, Faculty of Medicine, University of Toronto

Learning Objectives:

1. To explore the significance of apparent non-organic cognitive symptoms.
2. To review conversion disorder as it relates to dementia.
3. To learn strategies for differentiating between psychogenic and organic symptoms in cognitive impairment.

Friday, May 22, 2015
