

Project ECHO Liver Evening Series presents: Videoconferencing Educational Session

ECHO Evening Session

Liver Disease in Primary Care:

Approach to Hepatitis B

Please join us for our evening ECHO Ontario Liver series, which will cover approaches to different liver diseases in a primary care setting.

This evening session will consist of a didactic lecture by our inter-professional team and real de-identified patient cases by participants.

Topic: Liver Disease in Primary Care: Approach to Hepatitis B

About our Evening series:

- Open to all health care providers.
(Participants do not have to be a registered ECHO participant to join)
- Free and you can earn CME Credits
- Online - Video-conferencing Event

Session materials will be shared the week-day prior to the session.
Fully funded by the Ministry of Health and Long Term Care.
