SUBJECT: David Hallett moves to Supply Chain

Today we are announcing that we are combining the Ministry of Health Supply Chain team and the Ontario Health Supply Chain team under the leadership of David Hallett. David has been leading the COVID Diagnostics Capacity, which is also critical to our overall response, however it is clear that we need a unified team under single leadership to help support the supply teams carry out their important work. Indeed, there is no greater pressure on any of the workstreams in our COVID response than supply chain.

The supply chain teams at both OH and MOH have done exceptional jobs under incredibly difficult and ever-changing circumstances, and we believe that we will be even stronger as a single team as we face the ongoing need to source and distribute supplies across our system.

David has deep expertise in transforming IT applications to systemize data and logistics to modernize and track business processes.

Based on his team's work in significantly reducing the COVID-19 testing backlog and turnaround times, we are confident that David will help Ontario Health and the Ministry of Health unify systems to coordinate inventory logistics to match supply and demand as the province continues to prepare for the anticipated surge of COVID-19 patients.

Previously, David served as Associate Deputy Minister in various Ontario Ministries including Government and Consumer Services, Infrastructure, Culture and Sport, Health and Long-Term Care Government, and Shared Services.

On behalf of all the team, thank you, David!

Sincerely,

Melanie Fraser
Associate Deputy Minister Health Services
