

Nomination
Integrating digital health and virtual care
Essex County Nurse Practitioner Led Clinic
WE Health

Two of our clinic sites are in a rural area where most of our patients are seniors who have not had a lot of experience with virtual platforms and who may not have cell phones or tablets. The third site is in a high needs core area of the city of Windsor. WE Health ensures access to critical services through an electronic device lending program. This program demonstrates that social distancing and connection can simultaneously occur reducing perceived isolation and encourages ongoing use of disease prevention strategies among sub-communities and ultimately some of our most vulnerable patients. The delivery of remote health and wellness services promotes health and wellness services promotes health decision-making about lifestyle choices that reduce health risks and contributes to overall wellness, builds and maintains trusting relationships with providers.
