Guelph Family Health Team-Camille Loucks

Development of a Collaborative COVID Assessment Centre

At the onset of COVID-19 in Ontario in March 2020, the Guelph Family Health Team tasked a team of their employees with the development of a COVID assessment Center to support Guelph and Area residents who would require COVID testing. The Guelph Family Health Team sought out a like-minded partner in the Guelph General Hospital, who brought their infrastructure expertise to the creation of the assessment Center. Together, the Guelph Family Health Team and the Guelph General Hospital developed an efficient and effective COVID-19 assessment Center.
