Curbside INR Clinic

Patients requiring point-of-care blood tests for INR level (anticoagulation levels for patients on the blood thinner Warfarin) are now able to be seen “curbside” and have a nurse/Pharm come see them in their vehicle in the FHT parking lot – a phone # is posted for the patient to phone in to announce they have arrived, blood is taken on site, results given, any changes needed and next appointment booked all in the same visit.
