

## Query Instructions

The first attachment ‘Preventions Screening Search”, will let you search for any sort of preventative care screening, immunization etc. In order to search for Cancer screenings

1. After loading the search in the EMR, select the provider, enter in the item you’re searching for (you can do multiple and separate with a comma or one at a time) and the date range you’re looking for

### **QIDSS Prevention Report MRP-searchable between dates**

Prevention Report by type and date of service and by patients MRP Prevention Status-Completed=0 Completed externally=3 Refused=1 Ineligible=2

|  |  |
|--|--|
| <b>Step 1:</b> Provider Number                 | Gupta,Samantha(62) ▼   |
| <b>Step 2:</b> Item from the Prevention Module | MAM, PAP, FIU, FOBT (Comma Separated)  |
| <b>Step 3:</b> Start Date                      | 2021-12-01                                        |
| <b>Step 4:</b> End Date                        | 2021-12-01                                        |
| <b>Step 5:</b> Generate Query                  | <input type="button" value="Run Query"/> <input type="button" value="Export to CSV"/> <input type="button" value="Export to XLS"/> |

[View Template XML](#) [Edit Template](#) [Delete Template](#) [Export Template to K2A](#)

2. Click ‘Export to CSV’ in the deleted column of the report, any patients that have had their screening done at the clinic will have a 0, those refused will be 1, those ineligible will be 2, and those that had it done outside of clinic will be 3
3. The data can be cleaned by comparing to the SAR report.

The second search ‘Patients that have never received a specific prevention type’ will only search for patients that have no documented instances of a prevention screening in the EMR.
