

Presented by:  
**Public Health Ontario, Infection  
Prevention and Control**

Public Health Ontario is hosting a community of practice series that will review key concepts and support resources for Infection Prevention and Control (IPAC) in Primary Care settings.

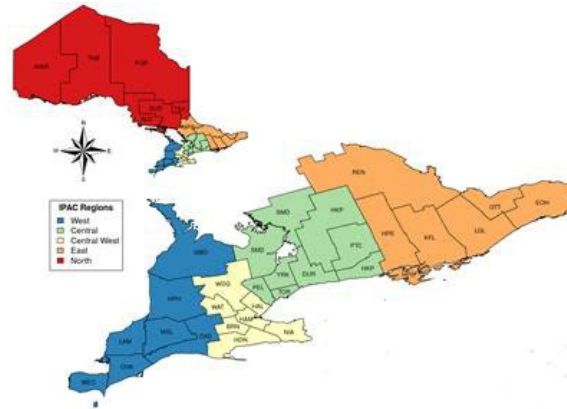

**Target Audience**

This series is intended for those who oversee or implement IPAC in Primary Care settings.

The Primary Care IPAC Community of Practice series will be held over four sessions. The topics include:

- IPAC risk assessments
- Attributes of physical space that support IPAC best practices
- Workflow and processes that support IPAC best practices in clinical settings
- Auditing IPAC to monitor and sustain best practices

**To register for these sessions in advance, determine in which region your practice is located and click on its associated link below:**

- Register [here](#) for the West Primary Care Series.
- Register [here](#) for the Central West Primary Care Series.
- Register [here](#) for the Central Primary Care Series.
- Register [here](#) for the East Primary Care Series.
- Register [here](#) for the North Primary Care Series.

**After registering, Zoom will send you an email with the connection information and details for these sessions.**

**Zoom Considerations:**

Please ensure you are using the most updated version of Zoom (5.8.3 or higher) in Chrome or another modern browser. Participants using older versions of Zoom prior to November 15, 2021 or Internet Explorer 11 will not be able to participate in polls with new types of questions or take quizzes. We recommend visiting [Zoom's tip page](#) for more information on how to upgrade to the latest version of Zoom prior to attending this series.

Contact [ipacimplementation@oahpp.ca](mailto:ipacimplementation@oahpp.ca) if you have any questions.
