

QIIMS' Cancer Screening Queries- Accuro

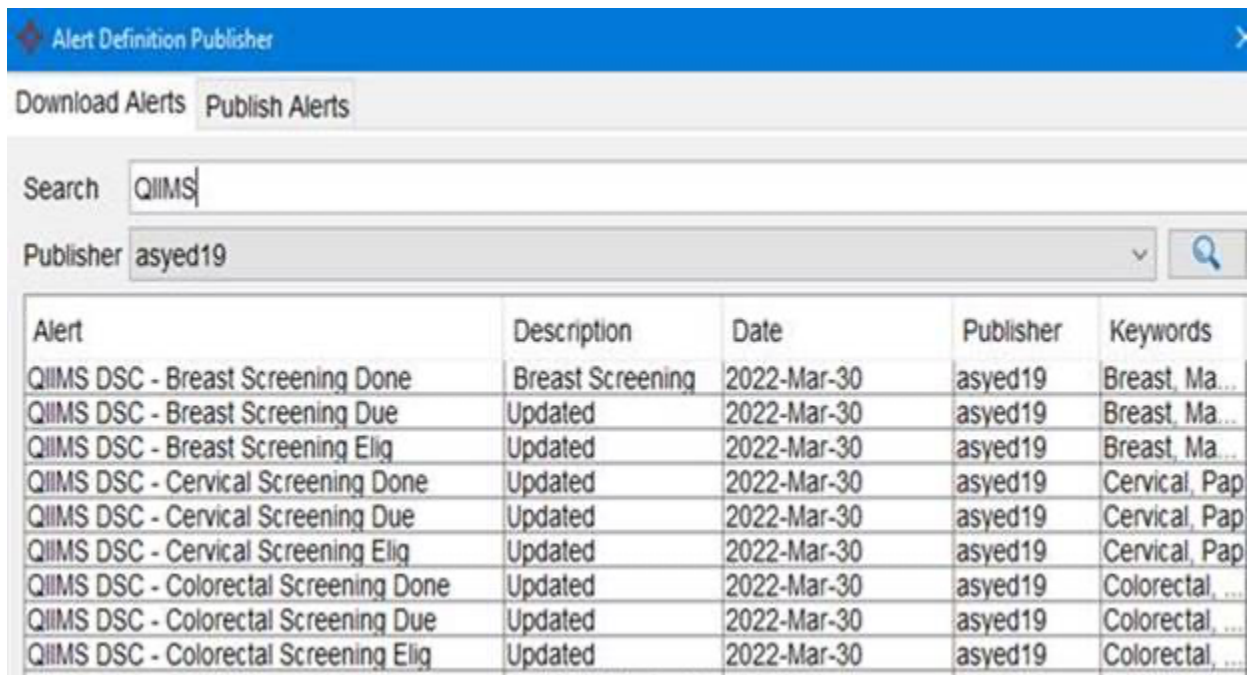

You may download the QIIMS' cancer screening queries from the "Alert publisher".

Please search for "QIIMS" with publisher **asyed19**. Please download the ones uploaded on 2022-Mar-30. These queries were created by 3 QIIMS (Al, Kathryn, Elyse) supporting 25 NPLCs across the province.

You may need to tweak some queries a bit based on your clinic settings. For example:

1. You might need to change the "test patient" names
2. You would likely need to adjust the "Appointment Type"
3. You need to remove "Georgina Island Pts" from the Status. Just keep it "Active"

For questions about these queries, please contact Al Syed at al.syed@gnplc.ca

The screenshot shows the 'Alert Definition Publisher' window. It has two tabs: 'Download Alerts' and 'Publish Alerts'. The 'Search' field contains 'QIIMS' and the 'Publisher' dropdown is set to 'asyed19'. Below the search filters is a table of results.
