

BRIGHT LIGHTS AWARDS

2023

Nomination: 3. Organizing primary care to advance Ontario Health Teams

Baawaating Family Health Team

Outstanding Service

Patients do not wait longer than 2-3 days or most time same day appointments. We recognize the need to see their provider sooner than later so that the impact of mental health can be sustained. We are an Indigenous Ontario Health Team. We recognize their needs are specific to Diabetics and provide programs accordingly among other CDM. There has been decreased risk of early deaths due to the care of our patients. We welcome families of all race to our clinic as well. Lower risk of Heart Disease and preventative measures on pre-screening for diseases. We conduct regular screening for colon cancer, mammogram pap test, early skin cancer awareness and STOP smoking programs. Definite decrease in numbers for sickness if able to control the early detection and better care to all our patients. We continue to grow as a clinic and take on new patients that have no health care. Numbers are pulled from a data base to ensure we are seeing the patients on a regular basis for blood work and follow up visits. Needs are addressed for any other concerns at this time.
