

BRIGHT LIGHTS AWARDS

2023

Nomination: 2. Optimising teams' capacity and creating efficiencies

Taddle Creek Family Health Team

Optimizing Asthma control with the Electronic Asthma Management System (eAMS) at Taddle Creek Family Health Team (TCFHT)

TCFHT's PCPs and Certified Respiratory Educators (CREs) have worked to optimize asthma management using Respiriologist Dr. Samir Gupta's digital eAMS tool. eAMS coupled with resumption of spirometry via the Respiratory Program at TCFHT helped restore timely access to clinical assessment and improved asthma control. eAMS prompts patients to complete a questionnaire regarding their asthma symptoms which are reviewed by the PCP who then assesses eAMS recommendations for medication changes if indicated. eAMS helps PCPs optimize asthma management based on the latest guidelines, provides patients with personalized asthma action plans (AAPs), helps identify triggers, and provides information about proper medication administration.
