

BRIGHT LIGHTS AWARDS 2021

Nomination: Demonstrating a community response to COVID-19

SOUTH EAST TORONTO FHT

Responding to a call for COVID-19 vaccine rollout: Serving the community beyond borders

The South East Toronto Family Health Team was the first primary care team in the city of Toronto to take part in the vaccine rollout. Since then, we have provided ongoing leadership, mentorship, and collaboration with a variety of primary care providers in the community to assist in their vaccination efforts. Our vaccine model is based on a sustainable Primary Care solution that successfully reduces barriers for hard-to-reach patients and community members and ensures that vaccines are administered in a fiscally responsible way. All clinics utilize 99% of our FHT resources only.
