

# BRIGHT LIGHTS AWARDS

**Nomination: It takes a team: collaboration inside and out**

**New Vision Family Health Team ICT  
New Vision ICT Geriatric Pilot Project**

With an increased need of support for our medically complex older adults not rostered at our clinic, New Vision FHT was tasked with assembling an interprofessional team to assess older adults in our community, connect them with resources, and prioritize care for these individuals. This team, consisting of MDs/NPs/RPN/RPhs, worked alongside regional geriatricians to assess/treat/monitor older adults needing a comprehensive geriatric review. This team was able to quickly assemble and address a currently unmet need, at the primary care level.
