

Upper Canada FHT – D2D Diabetes Indicator in Nightingale On Demand Statin

AFHTO D2D Diabetes Care Statin Numer v1

In Data Miner Module create new Standard Report

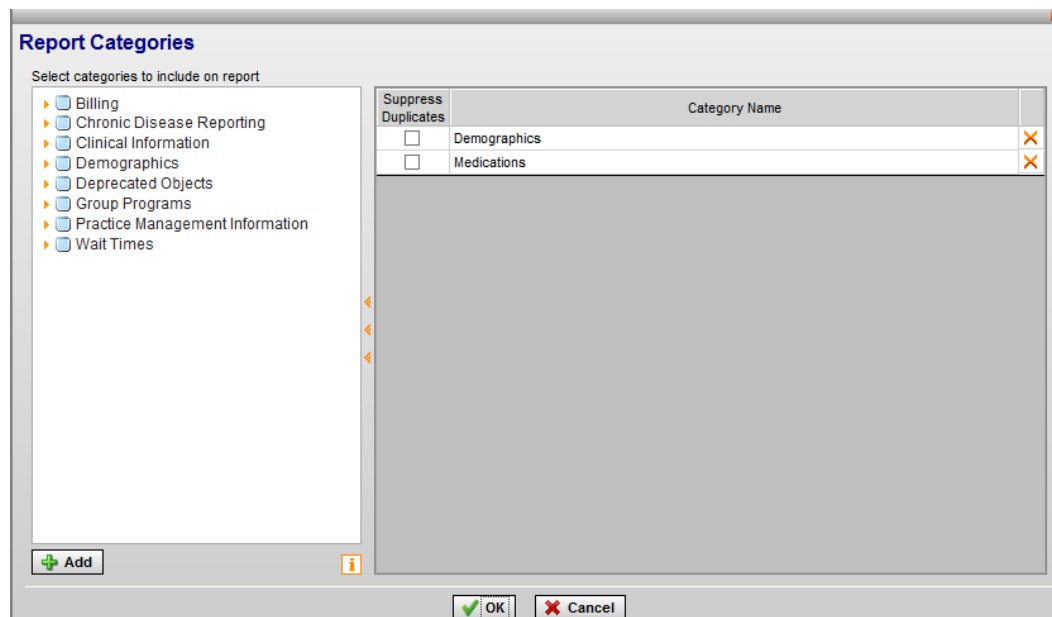

Name your report and file it in required folder and then click Next:

Categories: Select (double click or drag and drop the category) and then click Next:

- Demographics → Demographics
- Clinical Information → Medications

Upper Canada FHT – D2D Diabetes Indicator in Nightingale On Demand Statin

Report Categories

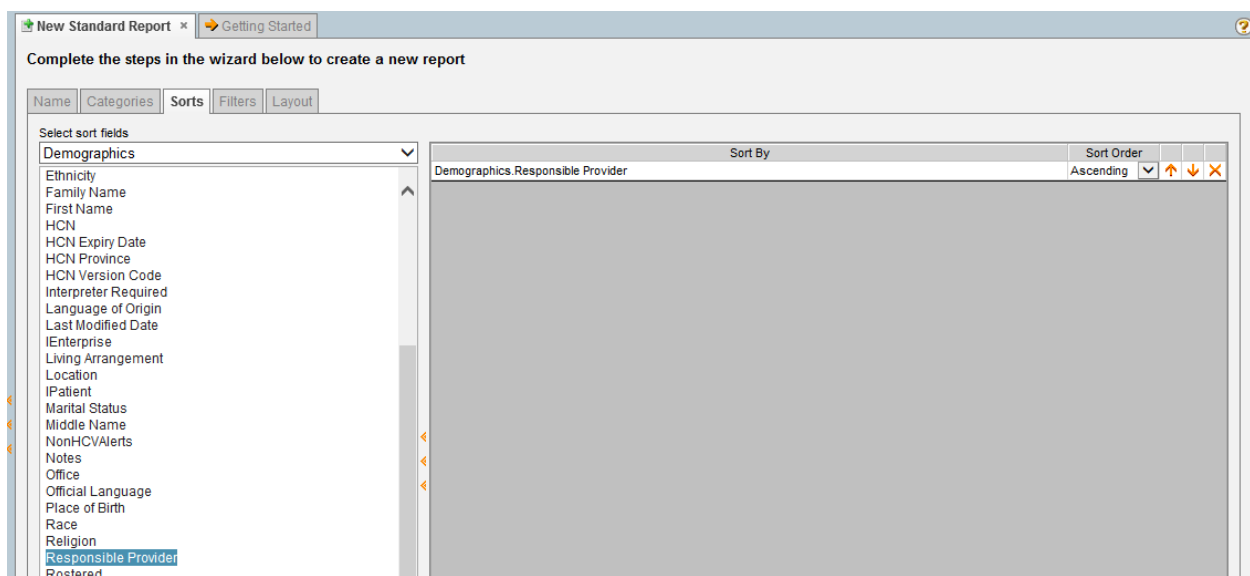

Select categories to include on report

- ☐ Billing
- ☐ Chronic Disease Reporting
- ☐ Clinical Information
- ☐ Demographics
- ☐ Deprecated Objects
- ☐ Group Programs
- ☐ Practice Management Information
- ☐ Wait Times

Suppress Duplicates	Category Name
<input type="checkbox"/>	Demographics
<input type="checkbox"/>	Medications

Sort: Can sort based on any parameter, in this example we used “Responsible Provider”. Select your sort parameter and then click Next.

NOTE: We selected Responsible Provider as the sort because we typically review our data per provider and for the entire group. This is an internal practice for Upper Canada FHT and not necessary for D2D.

New Standard Report x Getting Started ?

Complete the steps in the wizard below to create a new report

SUMMARY

(Medications.Drug Name Is One Of ('Pravachol', 'Pravastatin', 'Simvastatin', 'Fluvastatin', 'Rosuvastatin', 'Caduet', 'Atorvastatin', 'Lovastatin', 'atorvastatin', 'zocor', 'vytorin', 'pravachol', 'mevacor', 'lipostat', 'lipex', 'lescol', 'Atorlip', 'Altoprev', 'Altacor', 'Crestor', 'Lipitor') And Medications.Status = 'Active')

OK Cancel

TIP: Ensure that the Summary box at the bottom reflects the dates that you have selected. Sometimes when changing the date you need to click in the date box area to “force” the change in the Summary.

Layout: Click the drop down (see red arrow below) and select the required category. Either double click or drag and drop the required output fields. For this search we selected the following:

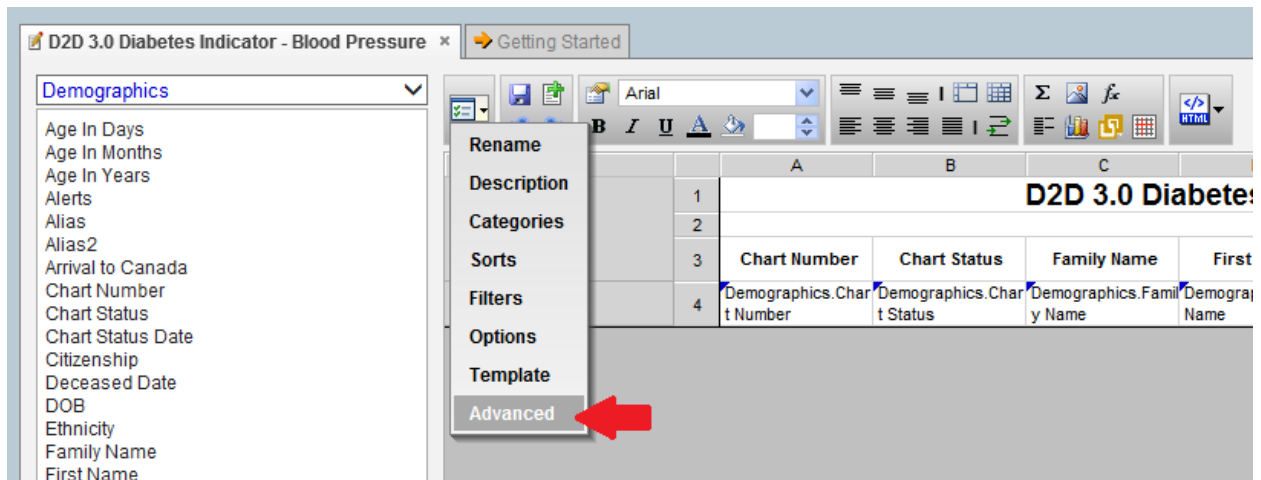

- Demographics
 - Chart Number
 - Chart Status
 - Family Name
 - First Name
 - HCN
 - Responsible Provider
 - DOB
 - Age In Years
- Medications
 - Drug Name
 - Prescription Date
 - Indications
 - Status

Once you have selected all of your outputs click Finish in the bottom right corner

Additional Settings and Functions:

Click the Drop down on the Report Options icon  and select Advanced.

If there are any ticks in either of the boxes below, remove (ensure both boxes are unticked) and then click OK.

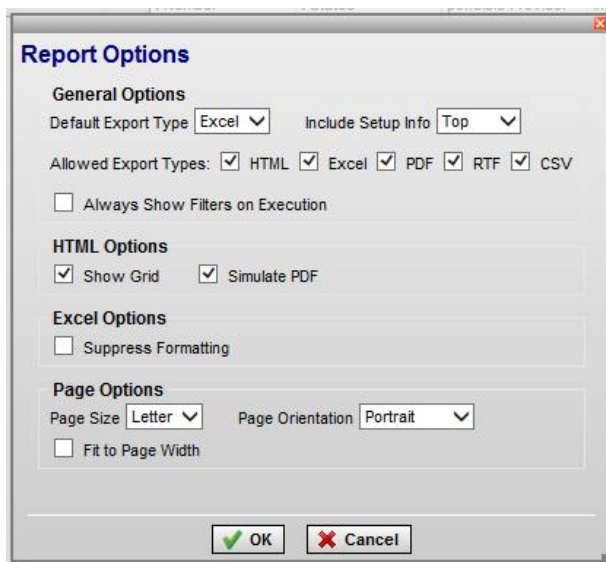

Upper Canada FHT – D2D Diabetes Indicator in Nightingale On Demand Statin

Click the Drop down on the Report options icon  and select Options

Change the Default Export Type to “Excel” and Include Setup Info to “Top” and then click OK

TIP: If you want the Export Type in something other than Excel either leave this option blank or select the appropriate type (Options are HTML, XLS, RTF and CSV).

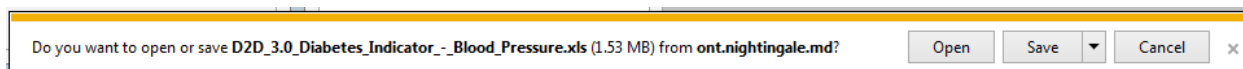

The 'Report Options' dialog box is shown with the following settings:

- General Options**
 - Default Export Type: Excel
 - Include Setup Info: Top
 - Allowed Export Types: ☒ HTML, ☒ Excel, ☒ PDF, ☒ RTF, ☒ CSV
 - ☐ Always Show Filters on Execution
- HTML Options**
 - ☒ Show Grid
 - ☒ Simulate PDF
- Excel Options**
 - ☐ Suppress Formatting
- Page Options**
 - Page Size: Letter
 - Page Orientation: Portrait
 - ☐ Fit to Page Width

Buttons: OK, Cancel

Click the Save icon  to save the report. When complete click the Excel icon  to run the report.

The Report filters that were set to “Prompt for Value” will pop up. Update date range appropriately and click OK

The file save dialog box shows the following information:

- Do you want to open or save D2D_3.0_Diabetes_Indicator_-_Blood_Pressure.xls (1.53 MB) from ont.nightingale.md?
- Buttons: Open, Save, Cancel

Upper Canada FHT – D2D Diabetes Indicator in Nightingale On Demand Statin

Report in Microsoft Excel:

- Verify the Setup Information is accurate.
- Delete the Setup information if not needed (or move to another sheet for reference)
- Use v-lookup to compare this list to your Diabetes registry and remove any patients that are not diabetic.
- As this indicator has two criteria contained in it (≥ 40 years and prescribed a statin therapy AND < 40 years) the following steps need to be taken to attain an accurate list;
 - Determine diabetic patients over the age of ≥ 40 years prescribed a statin therapy (using vlookup of diabetic registry list)
 - Add in diabetic patients < 40 years (from diabetic registry list)
