

Please consider this a request for data from ICES for our FHT for the following indicators (see table below). The definitions of each of the indicators are as discussed in data dictionary produced by AFHTO. Please provide data for the most recent fiscal year as well as the previous fiscal year for each indicator, understanding that this might not be the same year for all indicators. Please provide data for the physician groups listed in the table below, separately for each group and combined. All physicians in each of the groups listed are aware of this request and none have objected to it.

Physician payment group <i>[health team insert 4-digit alpha code]</i>	Type of group (ie FHN or FHO) <i>[indicate whether code is a FHN or a FHO]</i>

Please forward the data to the *Medical Lead* and *Executive Director* (indicated below).

Following review of your data, you will have the opportunity submit your data for inclusion in D2D 2.0 (instructions for data submission are found separately on the AFHTO members only web site D2D page). In any event, these data are for your review only and will not be forwarded to any other group or included in any report unless you request. These data will not be shared beyond the two designated AFHTO staff members who have signed confidentiality agreements and are responsible for compiling the reports and sending them to you and you only.

Important: Deadline to submit an ICES data request to AFHTO is Tuesday, April 21, 2015. Please scan and email to improve@afhto.ca or fax to 416 920 6556 to the attention of Denise Pinto. AFHTO will compile all requests and send them as one batch to ICES.

Teams can also access team-level data directly via the HQO portal, with the collaboration of one or more of their physicians. Before Dec 2015, the HQO portal will not be able to provide data about cost, SAMI or the team-based variant of 'regular care provider'.
