

YOU CAN NOW PRINT YOUR TEAM'S DATA TO DECISIONS (D2D) REPORT!

See below for a sample D2D team report printed directly from the live interactive report on the AFHTO website.

Any team can print out D2D results. The only difference for teams that did not contribute data is that they will only see data for the peer groups they select.

- For example, if they want to compare to teams in their own LHIN, the **yellow** bar will show performance of those teams.
- The **red** bar will show overall D2D performance.
- Teams that sent their data in to D2D will see a **blue** bar on their report, showing their own performance.

Your printout will be eight pages long and show all of the D2D indicators. The sample here shows information about the team (page 1) and results about the core indicators (page 5). The other pages show data about overall quality (pages 2 and 3), costs to the health care system (page 4), a summary of D2D results (page 6), and information about how results for the core indicators have changed since D2D began.

| Demographics* | |
|--------------------|-----------|
| Iteration: | 4 |
| Team code: | myfht2015 |
| Rostered Patients: | 8124 |
| Patients Served: | 8564 |

*Demographics are used to determine peers

| Peer demographics for comparison | |
|------------------------------------|---------------|
| Setting: | Rural |
| Teaching: | none |
| Access to hospital discharge data: | none |
| LHIN: | 13-North East |

| SAMI Score | | |
|--|--------------|-------------|
| Standardized ACG Morbidity Index: A surrogate measure of the complexity of patients served by the health care teams. The "average" Ontario has a SAMI equal to 1. Values above 1 indicate higher than average expected resource use. Score is provided by ICES based on OHIP billing data. | | |
| Team score | Peer average | D2D average |
| 0.99 | 1.01 | 0.99 |

| EMR Data Quality | | |
|------------------|--------------|-------------|
| Team score | Peer average | D2D average |
| 0.79 | 0.83 | 0.79 |

Core D2D Data

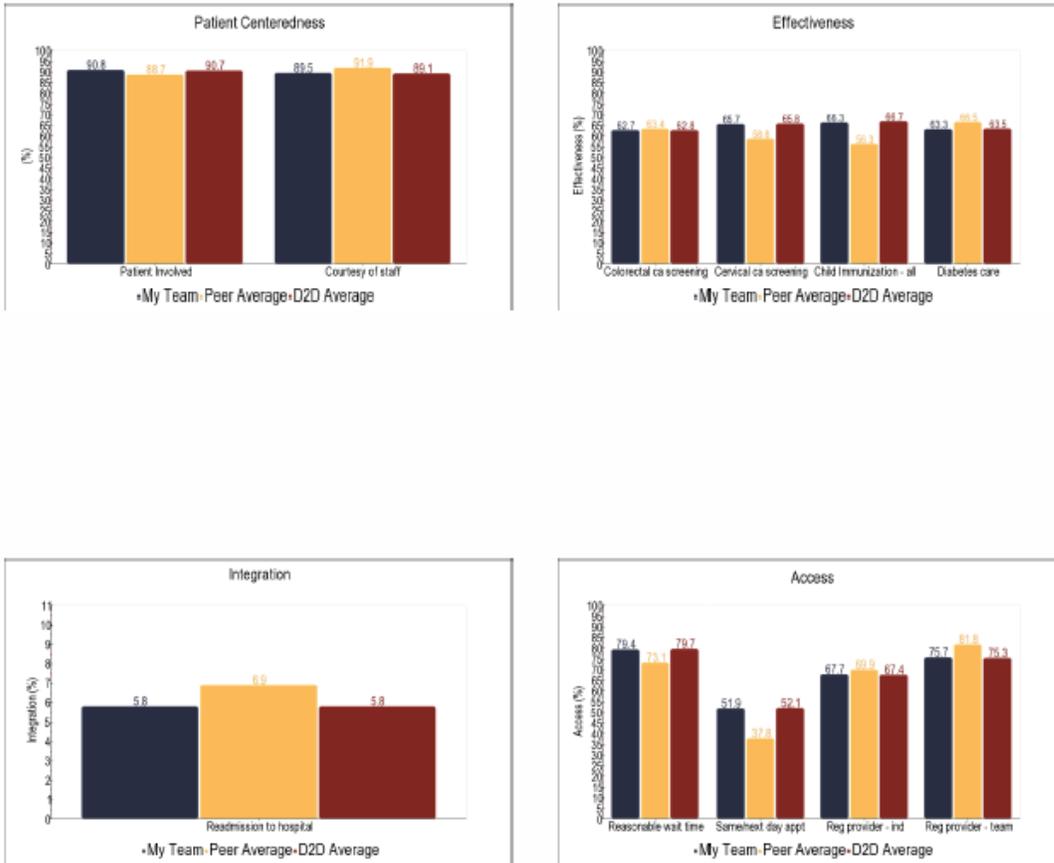

Figure 2: Page 8 of the printed D2D report, showing results for the core indicators.

- The yellow shows performance of the teams you have chosen to compare yourself to.
- The red bar shows overall D2D performance.
- The blue bar shows the team's own performance, if they contributed data to D2D.
