

Strategies for Building and Maintaining an Effective Board in Primary Care

TUESDAY, JULY 11, 2017

WEBCAST

12:00PM-1:30PM (EST)

Individual director skills refer to the area of expertise or knowledge that an individual director possesses. There are some skills that a board will always need: financial literacy, legal and governance expertise are typical requirements. Other skills may be required as a result of the direction or issue unique to the primary care practice.

To aid in the recruitment process, many boards have adopted the notion of a skills-based matrix as it helps to ensure there are dedicated individuals with the required organizational skills necessary to build an effective board that can collectively fulfil their fiduciary duties.

Join this webcast for discussion on:

- An overview of a board skills matrix
- How a skills matrix is used and why it is effective
- Board orientation best practices
- Elements to successful succession planning
